TRAFFIC SIGNAL CABINET REPLACEMENT AT CHAUTAUQUA AVENUE AND J. WILLIS STOVALL DRIVE

The City Traffic Control Division will be replacing the traffic signal controller cabinet at the Chautauqua Avenue intersection with J. Willis Stovall Drive on Monday, December 22, 2014, weather permitting. After 9:00 A.M., the intersection will be controlled by a 4-way STOP sign. Signal operation should be restored by 12:00 P.M. The cabinet at this intersection is obsolete and has begun to malfunction on a more consistent basis. An existing cabinet from the Division's inventory will be utilized in this change-out. Staff will take advantage of time when both OU and Norman Public Schools are not in session to minimize the impact to the motoring public.

Any questions about the project or this cabinet replacement should be directed to David Riesland, City Traffic Engineer, at (405) 329-0528 or David.Riesland@NormanOK.gov.
